Overview Backup

Jeanine Driscoll says she stands with Donald Trump 100% of the time and that means higher healthcare costs, higher gas prices, higher grocery prices for struggling Nassau families, and endless Washington corruption.

Jeanine Driscoll Says She Stands With Donald Trump 100% Of The Time And That Means –Higher Healthcare Costs, Higher Gas Prices, Higher Grocery Prices For Struggling Nassau Families, And Endless Washington Corruption.

Backup below.

Message #1 Backup

Jeanine Driscoll is too partisan and will do whatever Donald Trump wants and will be a rubber stamp for his agenda, even when it hurts Long Island.

Driscoll says that, in Congress, she will stand behind Trump "100% of the time"-- that means standing by his reckless policies that are making everything on Long Island more expensive. The Driscoll-Trump plan is clear: higher healthcare costs, gas prices skyrocketing, never-ending tariffs, and grocery prices through the roof.

Driscoll supported Trump's radical plan to gut healthcare and called the plan "wonderful" even though it will make the largest cuts to Medicaid in history, kick tens of thousands of Nassau families off their health insurance, increase premiums by as much as 300%, and could force hospitals to close.

Jeanine Driscoll Is Too Partisan And Will Do Whatever Donald Trump Wants And Will Be A Rubber Stamp For His Agenda, Even When It Hurts Long Island.

Driscoll Was A Proud MAGA Republican

Driscoll Said She Would Soon Be Added To MAGA Majority And That "I Am Eager To Earn President Trump's Support." "Local Republicans two weeks ago landed on Hempstead Receiver of Taxes Jeanine Driscoll to be their nominee against Gillen, after DeGrace dropped out and D'Esposito decided to stay in the Trump administration. Driscoll, who is not as well-known as D'Esposito, is still gearing up her campaign: She filed with the FEC last week, and a handful of local Republicans have touted their endorsement of her in recent days. 'Even though I just launched my campaign, the tremendous outpouring of support and enthusiasm has been meaningful and gratifying,' Driscoll told your host in a statement. 'We have already received extremely positive feedback from decision makers in Washington, and I believe that my name will soon be added to the MAGA Majority list. I am eager to earn President Trump's support.'" [Politico, NY Playbook, 4/28/26]

Driscoll: "We Want To See People Elected That Are Going To Stand With The President 100% Of The Time."

Driscoll: "We Want To See People Elected That Are Going To Stand With The President 100% Of The Time." DRISCOLL: "So, I do think a lot of these races, you know, they're all very critical. Um but certainly, we want to see people elected that are going to stand with the president 100% of the time." [Sid In The Morning via YouTube, 3:52, 5/19/26] (AUDIO)

Joint Economic Committee: The Average Household In New York Spent $4,500 More On Goods And Services Under Trump

Joint Economic Committee: The Average Household In New York Spent $4,500 More On Goods And Services Under Trump. "As of June 2026, the average household in New York has had to spend $4,500+ more on goods and services under President Trump. Despite President Trump's repeated pledges on the campaign trail that his administration would 'end inflation' and bring down costs for families, Trump and Republicans in Congress have instead caused costs to continue to rise significantly, including through Trump's reckless tariffs and war in Iran." [Joint Economic Committee, Fact Sheet, July 2026]

The War In Iran Pushed Up The Price Of Groceries, And U.S. Households Spent An Extra $200 On Food Costs Since The Iran War Started

Politico: The "Inflationary Impact Of High Diesel" Affects "The Cost Of Everything From Eggs To Sneakers," And Results In Price Rises That Are "Passed Along To Consumers." "Beyond the impacts to the cost of everything from eggs to sneakers, the inflationary impact of high diesel fuel lasts much longer in the economy than gasoline prices, said John Auers, analyst at consulting firm RBN Energy. Trucking, rail and freight companies sign long-term supply contracts for their diesel, meaning that a higher price will be baked into their costs – and passed along to consumers — for months at a time." [Politico, 5/6/26]

June 2026: U.S. Households Spent An Extra $200 On Groceries Since The Iran War Started. "The Iran war has cost Americans roughly $1,000 per household in higher fuel, food and other expenses since the start of the conflict in February, according to an estimate shared last week by Moody's Analytics chief economist Mark Zandi. […] Higher diesel costs have also increased the cost of transporting products from farms, factories and seaports, leading to higher retail costs, Zandi said. He estimates the typical U.S. household has spent an extra $200 on groceries due to higher fuel costs since the start of the war." [CBS News, 6/29/26]

New York Times: Grocery Prices Climbed At Their Fastest Rate In Four Years As The Effects Of The Iran War Weigh On The U.S. Economy. "Grocery prices climbed at their fastest rate in nearly four years, putting increased pressure on Americans' wallets at a time when many are already feeling pessimistic about the economy. Prices for groceries spiked in April, according to data released Tuesday by the Bureau of Labor Statistics, while broader inflation reached its highest level in nearly three years, as the effects of the war in Iran start to weigh on the U.S. economy." [New York Times, 5/12/26]

Washington Post: Tomato Prices Soared 15% In April Because Of The Rising Price Of Diesel Caused By Energy Shocks From The Iran War. "Tomato prices soared 15 percent in April compared with a month ago and are up nearly 40 percent in the last year. The red fruit is facing a barrage of hits, including the rising price of diesel caused by energy shocks from the war in Iran. With the Strait of Hormuz still closed, the global oil market is in turmoil, and prices for refined products, including gasoline and diesel, are sharply rising." [New York Times, 5/12/26]

New York Time Headline: "Prices For These Grocery Items Have Spiked Highest Since The War Began." [New York Times, 5/12/26]

The Iran War Led To Higher Energy And Utility Prices

New York Times: Energy Costs Increased Because Of The Iran War. "Daily life in America is getting more expensive, according to the latest inflation report from the Labor Department. Consumer prices rose 3.8 percent last month from a year earlier, their fastest rate in nearly three years, outpacing U.S. wage growth. Productivity is rising at a brisk pace, but the share of national income that goes to workers has sunk to its lowest point on record. The price increases were driven largely by energy costs, which have shot up sharply since the U.S. went to war with Iran. Airline fares are also up significantly. And the price of tomatoes surged nearly 40 percent over the last year because of bad weather, high tariffs and climbing transportation costs." [New York Times, 5/12/26]

- **New York Times Headline: "Inflation Accelerates As Iran War Drives Up Energy Costs."** [New York Times, 5/12/26]

New York Times: The Iran War Disrupted The Strait Of Hormuz Which Led To Higher Utility Bills. "Americans are starting to pay more for goods and services, from airline baggage fees to package deliveries. Companies have warned that higher energy costs tied to the war in Iran are forcing price increases across industries. Oil and gas prices surged after the United States and Israel launched attacks on Iran, disrupting shipments through the Strait of Hormuz, a narrow passageway through which roughly a fifth of the world's oil and gas supply typically passes. After more than five weeks of conflict before a cease-fire was called, the economic effects are becoming clearer. Gas prices have topped $4 a gallon on average. Utility bills have climbed and consumers are facing higher costs for groceries and air travel — prices that are unlikely to return to prewar levels anytime soon." [New York Times, 4/10/26]

Trump's Tariffs Were The Largest Tax Increase In The Country's History

Center For Economic And Policy Research: Trump's Tariffs Were The Largest Tax Increase In The Country's History

Center For Economic And Policy Research: Trump's Tariffs Were The Largest Tax Increase In The Country's History. "Donald Trump is putting in place the largest tax increase in the country's history with his big import taxes (tariffs). We won't know the full size of Trump's taxes until after Liberation Day III (August 1), and probably not even then, but we already know that they are huge. This is evident from the tariff revenue the government is collecting. In June the government collected $26.6 billion in tariff revenue. That is up from around $6 billion a month in 2024 before Trump's tax hikes. The difference of $20 billion comes to $240 billion on an annual basis. Summed over a decade, as we do with other measures, this comes to $2.4 trillion. This would be a substantial tax hike in itself, roughly $1,900 per household, but we know that the figure is almost certain to go much higher. Trump is threatening taxes of an additional 10 to 30 percent on imports from our major trading partners, such as Mexico, Canada, the European Union, and Japan. The tax take could easily end up being twice its current level, making Trump's tariff frenzy by far the largest tax increase in US history." [Center For Economic and Policy Research, 7/17/25]

Joint Economic Committee: Trump's Tariffs Would Cost Families More Than $2,500

Joint Economic Committee: Trump's Tariffs Would Cost Families More Than $2,500. "The Joint Economic Committee – Minority today released new data estimating that families could pay more than $2,500 in tariffs costs this year. Following the Supreme Court's ruling that the bulk of the President's tariff agenda was illegal, the administration moved immediately to enact new tariffs that Treasury Secretary Bessent claims will result in 'virtually unchanged tariff revenue in 2026.' The Committee estimated that if tariff revenue stays at the level recorded in January 2026 for the rest of the year, American families will pay more than $330 billion in tariff costs in 2026, an average of more than $2,500 in tariff costs per family. This is substantially higher than the more than $1,700 in average tariff costs that the Committee previously estimated that families paid during the first year of Trump's second term. 'Despite a Supreme Court ruling that much of Trump's tariff agenda is illegal, the Trump Administration refuses to provide relief for families,' said U.S. Senator Maggie Hassan, Ranking Member of the Joint Economic Committee. 'As American families continue to struggle with high costs, the President keeps choosing to institute new tariffs that will push prices even higher.'" [Joint Economic Committee, Press Release, 3/13/26]

Driscoll Said She Agreed With The One Big Beautiful Bill

Driscoll: "I Agree With H.R. 1." DRISCOLL: "Well, I feel I will be able to work with the Trump administration. I've already met with many members of the Trump administration over the last two weeks. We've made several trips down to Washington. And I've been welcomed. You know, they've been wonderful, supportive. I agree with the policies. I agree with H.R. 1. I agree with his policy of, you know, giving money back to people. No tax on tips." [News12, 7:00, 5/31/26] (VIDEO)

The One Big Beautiful Bill Did Not Extend Enhanced Premium Tax Credits For ACA Marketplace Plans Which Could Increase Premiums By As High As 300%

The One Big Beautiful Bill Did Not Extend Enhanced Premium Tax Credits For ACA Marketplace Plans

The One Big Beautiful Bill Did Not Extend Enhanced Premium Tax Credits For ACA Marketplace Plans. "The OBBBA did not extend enhanced premium tax credits for ACA marketplace plans. As a result, when open enrollment begins on November 1, 2025, 20 million marketplace enrollees will see their premium costs spike." [Center for American Progress, 7/29/25]

Enhanced Premium Tax Credits Helped More Than 20 Million People Afford Healthcare Coverage Through The ACA

Enhanced Premium Tax Credits Helped More Than 20 Million People Afford Healthcare Coverage Through The ACA. "Enhancements to premium tax credits, enacted in the American Rescue Plan and extended by the Inflation Reduction Act, are helping more than 20 million people afford health coverage in the Affordable Care Act (ACA) marketplaces." [CBPP, 11/3/25]

Center For American Progress: ACA Tax Premiums Could Increase As High As 300% For Some Individuals

Center For American Progress: ACA Tax Premiums Could Increase As High As 300% For Some Individuals. "As the federal government nears a shutdown, a central issue in the government funding fight is health care costs. Premium tax credits (PTCs) help lower the cost of comprehensive insurance coverage for more than 20 million people who buy health insurance on their own through the Affordable Care Act marketplaces. However, the enhanced level of financial support that has been in place since 2021 will expire at the end of this year, and Congress passed up multiple opportunities to extend it as part of the Big Beautiful Bill signed into law in July. […] In Alaska, the average premium cost among enrollees with financial assistance will increase 346 percent, or $909 annually. In California, the average premium cost among enrollees with financial assistance will increase 122 percent, or $1,000 annually. In Florida, the average premium cost among enrollees with financial assistance will increase 132 percent, or $521 annually. In Mississippi, the average premium cost among enrollees with financial assistance will increase 314 percent, or $602 annually. In Texas, the average premium cost among enrollees with financial assistance will increase 289 percent, or $459 annually." [Center For American Progress, 9/29/25]

[Joint Economic Committee, Press Release, 3/13/26]

2025-Present: Trump's Tariffs Were Still Enacted

2025: Trump Expanded Tariffs On Goods From A Wide Range Of Countries. "Starting in early 2025, President Trump expanded tariffs on goods from a wide range of countries under various authorities, including the International Emergency Economic Powers Act (IEEPA). The US Supreme Court in February 2026 struck down IEEPA tariffs. Other tariffs imposed by President Trump, including some dating back to 2018, remain in place. On August 6, the Trump Administration concluded the Section 232 investigation into polysilicon (used in semiconductors and solar panels) and imposed a 15 percent tariff and set minimum import prices on the product. TPC estimates the tariff will raise $7.3 billion over 2026–2036 (TPC's models do not compute the impact of import price controls). On July 31, President Trump also announced a new Section 201 tariff on quartz surface products. TPC estimates this will raise $600 million over the same ten-year period. TPC's model release notes contain a comprehensive list of policy details."

August 22, 2026: Trump's Tariffs On Canadian Imports Started. "After trade negotiations crumbled at the eleventh hour, U.S. President Donald Trump's 50% tariffs on scores of Canadian imports kicked in Saturday. The new levies are expected to affect about 5% of Canada's annual exports to the U.S., roughly $20 billion in goods ranging from hockey sticks to agricultural products. Canada's Prime Minister Mark Carney quickly promised Saturday that his government would roll out 'dollar for dollar' retaliatory measures starting Sept. 8." [PBS, 8/22/26]

The One Big Beautiful Bill Made The Largest Cuts To Medicaid In History

The Hill: Republicans Passed "The Largest Cuts To Medicaid Since The Program Began In The 1960s." Through The Big Beautiful Bill. "Senate Republicans on Tuesday passed the largest cuts to Medicaid since the program began in the 1960s, a move that would erode the social safety net and cause a spike in the number of uninsured Americans over the next decade. The tax and spending bill is projected to cost more than $3 trillion during that time, but it would be partially paid for with about $1 trillion in cuts to Medicaid. Almost 12 million lower-income Americans would lose their health insurance by 2034, according to the Congressional Budget Office (CBO)." [The Hill, 7/1/25]

The Big Beautiful Bill Was Estimated To Kick Off 24,940 NY-04 Residents Off Their Health Insurance

The One Big Beautiful Bill Did Not Extend Enhanced Premium Tax Credits For ACA Marketplace Plans

The One Big Beautiful Bill Did Not Extend Enhanced Premium Tax Credits For ACA Marketplace Plans. "The OBBBA did not extend enhanced premium tax credits for ACA marketplace plans. As a result, when open enrollment begins on November 1, 2025, 20 million marketplace enrollees will see their premium costs spike." [Center for American Progress, 7/29/25]

Enhanced Premium Tax Credits Helped More Than 20 Million People Afford Healthcare Coverage Through The ACA

Enhanced Premium Tax Credits Helped More Than 20 Million People Afford Healthcare Coverage Through The ACA. "Enhancements to premium tax credits, enacted in the American Rescue Plan and extended by the Inflation Reduction Act, are helping more than 20 million people afford health coverage in the Affordable Care Act (ACA) marketplaces." [CBPP, 11/3/25]

Center For American Progress: ACA Tax Premiums Could Increase As High As 300% For Some Individuals

Center For American Progress: ACA Tax Premiums Could Increase As High As 300% For Some Individuals. "As the federal government nears a shutdown, a central issue in the government funding fight is health care costs. Premium tax credits (PTCs) help lower the cost of comprehensive insurance coverage for more than 20 million people who buy health insurance on their own through the Affordable Care Act marketplaces. However, the enhanced level of financial support that has been in place since 2021 will expire at the end of this year, and Congress passed up multiple opportunities to extend it as part of the Big Beautiful Bill signed into law in July. […] In Alaska, the average premium cost among enrollees with financial assistance will increase 346 percent, or $909 annually. In California, the average premium cost among enrollees with financial assistance will increase 122 percent, or $1,000 annually. In Florida, the average premium cost among enrollees with financial assistance will increase 132 percent, or $521 annually. In Mississippi, the average premium cost among enrollees with financial assistance will increase 314 percent, or $602 annually. In Texas, the average premium cost among enrollees with financial assistance will increase 289 percent, or $459 annually." [Center For American Progress, 9/29/25]

The One Big Beautiful Bill Put 446 Hospitals At Risk Of Closing

The One Big Beautiful Bill Put 446 Hospitals At Risk Of Closing

The One Big Beautiful Bill Put 446 Hospitals At Risk Of Closing. "Most Americans don't think about where their nearest hospital is until they need it. Sometimes it's a car accident. Other times it's a child with a fever that won't break at 2 a.m. In those moments, the hospital and its highly trained, competent staff are simply there. The One Big Beautiful Bill Act, signed into law by President Trump on July 4, 2025, could change that assumption for millions of Americans. A March 2026 analysis by Public Citizen identified 446 hospitals at heightened risk of closure from the law's Medicaid cuts. Together, the hospitals have 69,000 beds, serve 6.6 million patients annually and employ roughly 275,000 staff." [Forbes, 4/30/26]

Multiple Hospitals Had Closed Because Of The One Big Beautiful Bill

Three Hospitals Closed In Virginia Because Of The One Big Beautiful Bill. "Two months after President Donald Trump signed a budget reconciliation package into law that contained $1 trillion in cuts to Medicaid and other federal health programs, Virginia is already losing rural health care providers. On Sept. 4, Augusta Medical Group announced the consolidation of three locations — Weyers Cave Urgent Care, Buena Vista Primary Care, and Churchville Primary Care — citing Trump's law as a reason." [Virginia Independent, 9/8/25]

Virginia Independent Headline: "Three Virginia Rural Health Clinics Closing Due To Trump's Budget Law." [Virginia Independent, 9/8/25]
