[...] Average US gas prices topped \$4 in March, according to AAA. Countries worldwide have faced gas price hikes, a direct result of surging crude oil prices. The spike in energy prices has shaken global markets, from stocks to bonds, gold and currencies. This affects both investors and consumers. Increased shipping costs have led to higher food prices in the US and other countries. Produce prices could also be affected by potential fertilizer shortages. [...] Credit card rates soared in 2022 and 2023, and the average annual rate remains above 19%. Credit card rates have stayed elevated despite the Fed cutting rates a few times across 2024 and 2025. The war with Iran has not directly pushed those card rates higher, but it's unlikely they'll come down anytime soon. Traders have dialed back expectations for the Fed to cut interest rates this year, with markets now anticipating the central bank will hold rates steady in the coming months. ‘If the Fed keeps rates where they are and doesn't cut, then credit card rates will remain elevated, making it more difficult to afford more routine purchases such as groceries or other spending that ends up in credit card balances,’ Stimmel said.” [CNN Business, [4/9/26](#)]

AppLovin Was Accused Of Tracking Users’ Locations Without Consent In A Class Action Lawsuit

AppLovin Was Tracking Users’ Locations Without Consent. “New Undisclosed On-Going Lawsuit—AppLovin Tracks Users Without Consent An undisclosed on-going class-action lawsuit filed in California in August 2024 accuses AppLovin of using its Adjust SDK to collect a ‘wealth of information’ and track users without their consent. Lawsuit States Tracking Occurs Even When Location Services Are Off Complaint States APP Bought Adjust to Bypass Apple Privacy Protections The lawsuit accuses AppLovin of tracking users even AFTER location services have been disabled. [...] According to the lawsuit: AppLovin uses Adjust SDK to tracks users’ precise locations, IP addresses, device IDs and other information about their behavior. AppLovin then siphons that location data directly into data brokers and cross-referencing the location data against a commercial database that tracks IP locations. AppLovin uses a ‘reverse IP lookup’ to track when users disable location services. It does it by intercepting IP address and AppLovin then uses that data and other device information to ‘fingerprint’ users and track across apps and devices. This work around allows AppLovin to overcome Apple protections, and fingerprint and track users without consent.” [Fuzzy Panda Research, [2/26/25](#)]

Bresnahan Voted For Tabling A Rule That Would Provide For Adoption Of A Resolution For Releasing The Epstein Files. In September 2025, Bresnahan voted for: “Adoption of the rule that would provide for floor consideration of the joint resolution (H J Res 104) disapproving the Bureau of Land Management rule relating to “Miles City Field Office Record of Decision and Approved Resource Management Plan Amendment,” the joint resolution (H J Res 105) disapproving the BLM rule relating to “North Dakota Field Office Record of Decision and Approved Resource Management Plan,” the joint resolution (H J Res 106) disapproving the BLM rule relating to “Central Yukon Record of Decision and Approved Resource Management Plan,” and the fiscal 2026 Energy-Water Appropriations bill (HR 4553). The rule would provide for up to one hour of debate on each measure. It would make in order 36 amendments to HR 4553, which may be offered en bloc. It would consider as adopted a resolution (H Res 668) that would direct the House Oversight and Government Reform Committee to continue its ongoing inquiry into the possible mismanagement of the federal government's investigation of disgraced financier Jeffrey Epstein and his associate Ghislaine Maxwell, the circumstances surrounding Epstein's death in federal custody, sex trafficking rings and potential ethics violations by elected officials. It would consider as adopted a resolution (H Res 605) establishing a select investigative subcommittee of the House Judiciary Committee to investigate the events surrounding January 6, 2021. It also would table a rule (H Res 598) that would provide for the adoption of a resolution (H Res 589) concerning the release of certain documents related to the Epstein case.” The bill passed 212 to 208. The transcripts were at the center of a court battle for about a decade after media investigations into Epstein's ties to the rich and the powerful seems to have allowed him to continue to rape and sex traffic teenagers without ever being sent to prison or serving a serious jail term. The voters deserve truth and transparency on what their leaders believe and where they stand. August 2025: According To Capitol Trades, Bresnahan Was The Second-Most-Active Trader This Congress. “Over the first several months of his freshman term in Washington, Representative Rob Bresnahan Jr., Republican of Pennsylvania, became one of the most active stock traders in Congress, despite having campaigned for his seat on a promise to end stock trading by lawmakers on Capitol Hill. Now Mr. Bresnahan’s trading is attracting more scrutiny after he made several transactions that appeared to benefit from the consequences of his own votes on the House floor. Democrats are working to weaponize Mr. Bresnahan’s trades against him as they plot a campaign to oust him in next year’s midterm elections, and some Republicans privately concede that the issue could hurt him in his highly competitive district as they attempt to hold onto their slim House majority. It is not just the striking number of trades that is dogging Mr. Bresnahan, a wealthy former chief executive of an electrical contracting company who was a top G.O.P. recruit. As of Thursday, he had made 626 stock trades since taking office, according to Capitol Trades, a site that monitors the stock market activity of lawmakers.

That number made him the second-most-active trader this Congress. It is also the possibility — or at least the appearance of one — that he could be benefiting financially from votes he made in Congress in favor of elements of President Trump’s domestic policy agenda that could end up harming his constituents.” [New York Times, [8/16/25](#)]

Washington Post: The One Big Beautiful Bill Slashed “About \$1 Trillion From Medicaid — The Largest Cut In The Program’s History, And At Least 17 Million Americans Are Projected To Lose Health Coverage.” “Congress has signed off on a \$3.4 trillion legislative package featuring new tax breaks, spending cuts, and more funding for defense and immigration enforcement, delivering President Donald Trump his ‘big, beautiful bill’ despite rumblings from fiscal hawks about the projected \$4 trillion it could add to the national debt over the next decade. The Hill: Republicans Passed The Largest Cuts To Medicaid Since The Program Began In The 1960’s. “Senate Republicans on Tuesday passed the largest cuts to Medicaid since the program began in the 1960s, a move that would erode the social safety net and cause a spike in the number of uninsured Americans over the next decade. during that time, but it would be partially paid for with about \$1 trillion in cuts to Medicaid. Almost 12 million lower-income Americans would lose their health insurance by 2034, according to the Congressional Budget Office (CBO).” [The Hill, [7/1/25](#)]

“CBO: Over 500K Pennsylvanians will Lose Health Care Come December” [Central Penn Business Journal, [5/29/26](#)]

More Than Half A Million Pennsylvanians Will Lose Health Coverage By December 2026 Due To The One Big Beautiful Bill. “Over a half million Pennsylvanians will lose their health care coverage come December due to the Trump Administration’s reconciliation bill, the nonpartisan Congressional Budget Office (CBO) reports. CBO’s analyses indicate that health care cuts could cause up to 600,000 Pennsylvanians to be stripped of their Medicaid and Affordable Care Act (ACA) subsidies, costing the commonwealth tens of billions of dollars. House Budget Committee Ranking Member Brendan Boyle (D-Phila.), recently joined House Democratic Policy and Communications Committee Chair Debbie Dingell (MI), House Administration Committee Ranking Member Joe Morelle (D-NY), and Rep. Adelita Grijalva (D-AZ), to address Americans impacted by Congressional Republicans’ historic cuts to health care. Additional cuts are reportedly being considered by President Trump and House Republicans to pay for the war in Iran. ‘Stop Taking Our Health Care’ was a month-long nationwide campaign to, as its site states, ‘fight back against Republican efforts to rip health coverage away from working families.’ Cuts to Medicaid and elimination of enhanced health care tax credits have sent premiums soaring. A recent report by USA Today stated that

145,000 Pennsylvanians have dropped their health insurance as premiums skyrocket by as much as 485% in some communities.” [Central Penn Business Journal, [5/29/26](#)]
